

Priyanshu Pramanik

Software Engineer

Kolkata, India | +91 6204058150 | priyanshuallex@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Analytical and detail-oriented Software Engineer specializing in full-stack web development, relational database design (PostgreSQL, MySQL), and intelligent automation. Proven capability in constructing high-performance React user interfaces, scalable Node.js/Express API backends, and Python-driven machine learning microservices. Recently expanded into agentic AI systems — designing LLM orchestration pipelines and local-first, tool-using assistants. Strong academic record (8.95 CGPA) combined with technical internship experience designing data pipelines and automating workflows.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL (PostgreSQL, MySQL), HTML5, CSS3

Frontend: React, React 19, Tailwind CSS, DOM Manipulation, Responsive Web Design

Backend & APIs: Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication, MVC Architecture

Databases: PostgreSQL, Neon DB, MySQL (indexing, schema design, query optimization), MongoDB

Tools & Cloud: Git, GitHub, Docker, Postman, Vercel, Render, CI/CD pipelines

AI & Agentic Systems: LLM Orchestration (LangGraph, CrewAI, Smolagents), MCP, Local LLM Inference (Ollama, vLLM), Vector DBs (Chroma, Qdrant, FAISS), Claude Code Agentic Automation, Voice AI (Whisper, Piper/Coqui)

Systems & Auto: ETL Pipelines, Data Validation (Pandas, NumPy), SMTP Outreach Automation

PROFESSIONAL EXPERIENCE

Technical Intern — GAOTek Inc. Aug 2025 – Nov 2025

- Engineered an automated product documentation workflow to catalog 120+ SaaS/Automation products, reducing manual entry errors by over 20%.
- Integrated Apollo, Clay, and Thunderbird APIs to design a unified lead generation pipeline, generating 100+ qualified leads daily.
- Built and scaled email outreach campaigns using SMTP automation, maintaining database accuracy for follow-ups.

PROJECTS

Wanna Watch — AI-Powered Movie Discovery Platform — React, Node, FastAPI, ML

- Designed a hybrid recommendation engine combining Content-Based Filtering (TF-IDF & Cosine Similarity) on a custom dataset with real-time TMDB API lookups.
- Formulated a 5-question personality quiz algorithm to output dynamic user matching scores, increasing user engagement.
- Developed full-stack user services featuring secure JWT authentication, stateful favorites/watchlists, and responsive lazy-loaded sections.
- Orchestrated a microservices-based deployment utilizing Vercel for frontend and Render for backend and machine learning microservices.

CleanFlow — Automated Data Pipeline — Python, FastAPI, ETL

- Engineered a robust ETL data cleaning pipeline to ingest, validate, and standardize messy real-world datasets, saving up to 85% of manual cleaning time.
- Implemented business-rule validation checks for format accuracy (emails, phone numbers, dates) and schema consistency.
- Programmed a reporting system that generates structured Excel summary reports mapping data anomalies for stakeholder review.

TaskForce — Full-Stack Productivity Platform — Node, Express, PostgreSQL, MySQL

- Overhauled a legacy task application into a high-performance, dark-themed brutalist UI featuring modular layout blocks and custom CSS typography.
- Scaled an MVC-based backend utilizing Express, optimizing database queries and connection pools across PostgreSQL and MySQL database instances.
- Implemented token-based authentication (JWT) and secure input validation to enforce server-side security.

HACKATHONS & COMPETITIONS

Selected Finalist / Next-Round Competitor 2023 – 2025

- Competed in institutional and regional hackathons, pitching and developing rapid-prototype software solutions under tight constraints.
- Engineered working backend code and schema designs during 24–48 hour coding sprints, collaborating in multidisciplinary teams.

EDUCATION

Swami Vivekananda University — B.Tech in Computer Science & Engineering 2024 – 2027 (Expected)

Grade: CGPA 8.95 / 10.0

Government Polytechnic Khutri — Diploma in Computer Engineering 2021 – 2024

Grade: Distinction

CERTIFICATIONS

- CS50's Introduction to AI with Python — HarvardX (2025)
- CS50's Introduction to Computer Science — HarvardX (2024)
- Software Engineering — NPTEL / IIT Kharagpur (2024)
- OSINT Using Python — CyberVidyaPeeth (2023)
